Current AADT – 16,500
2015 AADT – 27,000
2015 PH VOL – 2,400
Trucks – 14%

Project Information

Purpose and Need for Project:

The project will relieve congestion and improve safety on existing Route 65 in the vicinity of Lincoln and provide regional traffic solutions that accommodate projected traffic volumes for future years.

Scope of Project:

The project will provide a new 4-lane and 2-lane expressway on a new alignment from the junction of Industrial Avenue south of Lincoln including a new limited access to local arterial roads. The project will bypass Lincoln to the west and north of the city and reconnect to existing Route 65 south of the Bear River (County line)
